

PROJECT FACT SHEET

GBU Mine, Indonesia

CUSTOMER:

**PT Gunung Bara Utama
(GBU)**

LOCATION:

The GBU project is located near Melak, West Kutai Regency of East Kalimantan, Indonesia.

STATUS:

Current
Start date: March 2018

THE CONTRACT - HAULAGE:

Bis delivers essential load and haul services to PT Gunung Bara Utama (GBU) as part of its East Kalimantan coal mine operations.

Core to the long term contract is the specialised off-road haulage of coal from the GBU mine to the barge loading facility located 60km east on the Mahakam river.

Additionally, Bis conducts critical road maintenance services to the same stretch of road.

The Bis team works closely with PT Gunung Bara Utama to deliver safe, efficient and innovative solutions across the contract.

MINING OPERATIONS:

PT Gunung Bara Utama (GBU) is a privately-owned Indonesian mining company established in 2007. The company primarily undertakes coal mining and mining-related activities.

The GBU project is located just outside Melak, West Kutai Regency of East Kalimantan, Indonesia, and provides resources to the world's coal markets.

GBU's concession area of 5,350 Ha is located in Mantar village, Damai sub-district, with the mining concession located 60 km west of the Mahakam River.

ASSETS:

PEOPLE

- » Bis has a 220-strong workforce at this site, many of whom reside in the surrounding communities.

EQUIPMENT

Bis provides a bespoke haulage fleet including:

- » High-payload single powered road trains
- » T1250 trucks
- » Hydraulic excavators
- » Truck loading hoppers
- » Road maintenance equipment

Our customer also benefits from the latest Bis safety and productivity management systems, including the use of best-in-class, proprietary cloud-based artificial intelligence monitoring systems.

METS EXPORTER OF THE YEAR AWARD

Bis received Australia's Mining Monthly's METS Exporter of the Year 2018 Award for its innovative haulage solution in Indonesia.

The award recognised the mining, equipment, technology and services (METS) provider that had the most significant export win by value or technological solution during the year. Bis received due recognition for driving productivity breakthroughs in the resources supply chain.

This was achieved through the introduction of Bis' bespoke, high-output T1250 trucks and dual-powered road trains in Indonesia, with the aim of delivering a step change improvement in productivity and efficiency for Indonesian miners.

KEY ACHIEVEMENTS:

FEMALE OPERATORS' PROGRAM

Bis welcomed its first intake of female operational trainees to our East Kalimantan operation in late 2019, as part of a new traineeship program targeted at increasing female participation in our Indonesian business.

After completing training on various auxiliary equipment, several groups of trainees have successfully graduated from the six-month course and pursued careers with Bis and in the industry.

The program marks another important step towards growing diversity throughout our business.
