

## PROJECT FACT SHEET

# Newlands Mine, Qld

### CUSTOMER:

---

**Glencore Australia**

### LOCATION:

---

### Newlands Coal

The Newlands mine is located 33km north-west of Glenden in Central Queensland's Bowen Basin region.

### STATUS:

---

**Current**

Start date: 1998

### THE CONTRACT - LOGISTICS:

---

Bis provides a range of load and haul and site services to Glencore Australia's Newlands mine site.

Key contract components include:

- » road maintenance
- » road haulage from multiple pits to the processing plant
- » waste haulage
- » reclamation of old pits to feed back in to the CHPP.

The on-site Bis workshop plays an integral role in servicing and maintaining the fleet that service the contract.

### MINING OPERATION:

---

Development at the wholly Glencore-run Newlands mine began in 1981, with coal mining operations commencing in 1983.

The Newlands mine site is part of the GCAA Project, a mining, processing and exporting partnership which includes the Newlands open cut operations, the Collinsville open cut mine.

## ASSETS:

---

### PEOPLE

- » Bis has 110 employees working at the Newlands mine site in a variety of functions.

### EQUIPMENT

Bis equipment on site includes:

- » Rexx – Bis' 160-tonne mining haul truck (from July 2020)
- » dual-powered road trains (DPRT)
- » front end loaders
- » excavators
- » dump trucks
- » road maintenance equipment
- » dozers

## KEY ACHIEVEMENTS:

---

### LONG-TERM PARTNERSHIP

We are proud to have been part of the Newlands operations since 1998, working in collaboration with the Glencore team to deliver tangible efficiency and productivity benefits.

Late 2018 saw the latest contract renewal for the Bis and Glencore partnership at the Newlands mine.

Commenting on the contract award, Glencore Operations Manager – Newlands Paul Sear said:

“We have enjoyed a positive, long-term partnership with Bis at Newlands. Bis’ strong commitment to delivering safe and innovative solutions that add value to our operation has been recognised in this contract renewal, and we look forward to continuing our successful relationship with the team.”

### DPRT INNOVATION

Bis has invested in a fleet of high payload dual-powered road train technology (DPRT) to maximise Glencore’s production requirements and provide production and haulage efficiencies across the operation.

Bis’ ability to move bulk commodities in smarter, safer and more reliable ways continues to drive efficiencies at the site.

### REXX ON SITE

A collaboration between Glencore and Bis saw Rexx – the new 160-tonne innovative mining haul truck - begin working on site at Newlands in July 2020.

Its first operational role at an Eastern seaboard mine was testament to its growing reputation for productivity, safety and cost effectiveness on the West Coast.
